PROFESSIONAL SUMMARY

Technical Project Lead with over 4 years of experience in software development and project delivery within Agile environments. Proven ability to manage end-to-end software lifecycle, define and translate business requirements into technical solutions, and lead cross-functional teams to deliver high-quality projects on time. Experienced in scope management, risk mitigation, stakeholder communication, and aligning technical execution with business objectives. Combining hands-on engineering expertise with structured project management practices to drive successful software initiatives.

Work Experience

inmind. ai.

Lebanon, 01/2025 - Present

Technical Project Lead

- Define and document business and technical requirements by working closely with clients, stakeholders, and engineering teams to translate needs into actionable delivery plans.
- Lead stakeholder communication by providing regular status updates, aligning expectations on scope, timelines, risks, and deliverables.
- Plan and manage project timelines across multiple concurrent initiatives, identifying dependencies and adapting plans to evolving business requirements while meeting deadlines.
- Conduct risk and impact analysis, propose mitigation strategies, and support data-driven decision-making to reduce delivery and budget risks.
- Perform feasibility studies and scope assessments, contributing to financial proposals and resource planning.
- Oversee the full software delivery lifecycle from initiation to closure, ensuring alignment between business objectives and technical implementation.
- Prepare, validate, and maintain Project Implementation Plans (PIP), clearly defining deliverables, milestones, and success criteria.
- Monitor project performance and report insights on progress, risks, and blockers to management and stakeholders.
- Produce and maintain structured project documentation, including functional inputs, work packages, and retrospectives to support continuous improvement.
- Build strong client relationships through transparency, responsiveness, and consistent delivery of business value.

Lebanon, 08/2021 - Present

Software Engineer

- Develop flexible and reusable backend code to support the team in delivering goals on time.
- Execute defined backend tasks within project scope and contribute to problem-solving with structured solutions.
- Collaborate within a team under the guidance of a manager or team lead.
- Actively participate in Agile ceremonies, including planning, daily stand-ups, reviews, and retrospectives.
- Take ownership of assigned tasks, ensure timely delivery, and collaborate with reviewers to address issues and bugs.
- Author and maintain technical documentation for developed features.
- Read, understand, and navigate code written by other developers to enhance collaboration and efficiency.
- Balance speed and quality in coding tasks, optimizing based on team priorities and requirements.

BMW AG (innovation LAB)

Germany, 01/2021 -07/2021

Software Engineer

- Research and Develop new Computer Vision Applications
- Develop and maintain RestAPI, OOP Applications
- Develop and maintain high-quality Object-Oriented Backend RESTful APIs
- Ensure that APIs are secure, scalable, and maintainable
- Continuously improve the performance of the API
- Troubleshoot and debug any issues with the API
- Collaborate with cross-functional teams to ensure smooth integration with front-end applications
- Write clean, efficient, and well-documented code

Dorcas/Tabitha

Lebanon, 07/2016 – 07/2021

IT Officer

- IT technical services for Dorcas's offices
- Development of Database
- Maintenance of the Database
- Create/Update and maintain KOBO questionnaire

EDUCATION

Antonine University – Computer and Communications Engineering – Software Engineering and Networks.

Lebanon, 2023

CERTIFICATES & TRAININGS

- CCNA Routing and Switching: Scaling Networks, 2021
- CCNA Routing and Switching: Introduction to Networks, 2017
- CCNA Routing and Switching: Routing and Switching Essentials, 2018

TECHNICAL SKILLS

- Programming languages: Python, C++, Java, JavaScript, C, .NET
- Web Development: HTML, CSS
- AI/ML & Computer Vision: TensorFlow, PyTorch, OpenCV, Computer Vision, Machine Learning
- Database & Backend: SQL, RESTful APIs, Object-Oriented Programming (OOP)
- Tools & Utilities: Azure DevOps (Agile Boards, Task Management), Microsoft Project, Git, Docker, MS Office (Excel, Word, PowerPoint, Visio)

LANGUAGES

- Native in Arabic
- Fluent in English
- Fluent in French

AREA OF EXPERTISE

- Stakeholder Communication & Alignment
- Leadership & Cross-Functional Collaboration
- Time Management & Delivery Focus
- Confidentiality & Professional Integrity
- Requirements Analysis & Attention to Detail
- Structured Problem Solving & Analytical Thinking
- Interpersonal Skills
- Client Orientation & Relationship Management
